Profile Overview

- **Theme** - Healthcare
- **Problem Statement Title**- (Enhancing Gym Awareness and Personalised Nutrition Planning Using AI-Powered Solutions)
- **Team ID** -
- **Team Name** - CodeCrafters

IDEA TITLE

Proposed Solution: Develop an AI - driven platform that syncs with gym systems and wearables

Solution Overview: Tracks performance, suggests personalised nutrition and workouts.

Problem Solving: Uses ML to analyse data and improve individual fitness outcomes.

Innovation: Integration of real-time wearables with adaptive AI models for custom plans.

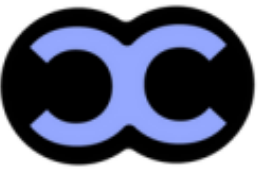

Technical Approach

- Technologies Used: Python, TensorFlow, React, Firebase, wearable APIs.
- Methodology: Collect data, preprocess, train models, deploy app with feedback loop.
- Process Flow: User data > AI engine > recommendations > user feedback > model tuning.

FEASIBILITY AND VIABILITY

- Feasibility: Tech stack is accessible and integrations with APIs are possible.
- Challenges & Risks: Wearable compatibility, data privacy concerns.
- Mitigation Strategies: Use standard APIs, encrypt sensitive data, comply with GDPR.

IMPACT AND BENEFITS

- Target Audience Impact: Gym members, trainers, athletes and health-conscious users.
- Key Benefits: Personalised health, reduced trainer dependency, data-driven planning.
- Long-Term Value: Expandable to clinics, sports teams, and health center.
